Vickers Carden-Loyd Model 1933 – Finnish Armour Museum, Parola (Finland)
This tankette, with 3 others, was bought in 1933 for testing purposes, but never used in combat. It was used for training purposes instead (http://www.jaegerplatoon.net/TANKS1.htm)

Vickers Carden-Loyd Tractor Truck – Museu Militar de Elvas (Portugal)
Most if not all T13s were sent to the eastern front as radio guided mobile explosive devices and hence destroyed. Ours was found by one of our tank museum volunteers in the cellars of the Army Museum in Vienna. After some protracted negotiations, a Belgian C130 dropping some SF troops in Bavaria, ‘flew by’ Vienna and loaded up our T13. When arriving at Royal Army and Military History Museum we discovered the original battery was still plugged in. Even more astonishingly it still carried it's original camo paint and markings of the ‘Limburgse Grenswielrijders’ of May 1940. This was a border protection regiment and when we officially presented the vehicle to the Museum, they formed up an honour guard whilst it drove by with some very poignant scenes of emotion. Since being fragile and original, it stays on static display inside the museum (Museum staff member via Craig Moore). Still in Brussels in May, 2016

Vickers Carden-Loyd Amphibious Tank – Kubinka Tank Museum (Russia)
Vickers Carden-Loyd Amphibious Tank – Kokopo (East New Britain, Papua New Guinea)
This vehicle is most probably a Vickers Carden-Loyd M1931 Amphibious Tank that was captured in China with some others and used by the Imperial Japanese Army (IJA). An IJA document states that one Vickers Light Amphibious Tank equipped with a Japanese machine gun was tested at Rabaul in 1943, and it could be this one (Akira "Taki" Takizawa)

Vickers Carden-Loyd Model 1934 – Sammlung Historische Panzer, Thun (Switzerland)
SN 825, RN M-7305. It has been stored indoor in the last few years. The tank’s engine has been removed, so that some parts can be used to make the other tank below a runner (Massimo Foti). Its data plate states it was built at the Vickers-Armstrongs Elswick Works in August 1934 (Trevor Larkum)
Vickers Carden-Loyd Model 1934 – Panzermuseum, Thun (Switzerland)
SN 824, RN M-7304. It has been stored outside for a very long time, and was still outdoor until last summer. Right now it is stored at Swiss Army's workshop in Thun and planned to be returned to running condition, using some parts from the tank above (Massimo Foti). Its data plate states it was built at the Vickers-Armstrongs Elswick Works in August 1934 (Trevor Larkum)

Vickers Carden-Loyd Model 1936 – Bovington Tank Museum (UK)
This tank is known as "commercial" or "export" version (Neil Baumgardner)

Vickers-Carden-Loyd Light Tank Mk VI – Imperial War Museum Duxford (UK)
This tank was used with eleven others prior to WW2 at the Singleton Military Training Area in New South Wales, Australia, and then at the Bandiana Military Training Area, Victoria, Australia. They did not see service outside Australia during WW2 but they were used as targets for small arms fire after the war. In 1947, the owner of a rice farm in Griffith, New South Wales, Australia purchased two Mk.VI light tanks directly from the Australian Army base auction at Bandiana. A private Australian collector purchased the tank from that owner at another auction in 1977 but later sold it to the Budge Collection in 1987. It was shipped to the UK and later sold to the Imperial War Museum (Gina Wilson via Craig Moore)

Any information about the current location, and any recent picture of this tank are the most welcome

Thai Type 76 AA Vehicle – The 7th AA Regiment in Pathum Thani (Thailand)

any British tankettes, light or medium tank that I forgot….

This document is a compilation of photos published on the web. I would like to thank especially Rafał Białęcki, who deserved the most of the job on this document, and also the people who took these photos and put them on their websites, or sent them to me, and those who helped me doing these lists (particularly people of the AFV News Discussion Board). For any question, you can email me at soldat_ryan@hotmail.com
