Churchill Mk I – Canadian Forces Base, Borden (Canada)

David Payne, December 2020

Churchill Mk II – Bovington Tank Museum (UK)

Built as a Mark II, this tank was recovered from Stainburn Gate Forrest near Harrogate, Yorkshire, where it had been bogged down and abandoned during the war (Museum). This tank was part of the Museum of Army Transport, Beverly (UK) before the museum was closed. It was also displayed for some time at the Lowick Homeguard Unit in Lowick (U (<http://www.armouruk.net/churchill.htm>))

Churchill Mk III* – Bovington Tank Museum (UK) – running condition

Owned by The Churchill Trust, but on long term loan to Bovington. This tank had been converted from a gun tank to an AVRE, and had applique armour fitted not only to the hull, but also to the turret front and sides. It was rescued from a range in relatively poor condition. The aim of the restoration was to return the tank to a Churchill Tank Mk III* with a 75mm gun. The Applique armour has been retained, albeit with the AVRE fittings removed (source : http://www.churchilltank.com/Home_Page/MK_III.html). As of Jan. 2014, the owner has found that the tank was T31831, which was part of a contract placed in late 1940 with Birmingham Railway Carriage Company

Churchill Mk IV – Bovington Tank Museum (UK) – running condition

Owned by The Churchill Trust, but on long term loan to Bovington. This tank began life as a Mk I or II and was upgraded during the war to become a Mk IV. Following the war this tank was converted to a "Twin Ark", an unusual vehicle that enabled the massive Conqueror tank to cross obstacles. It has been the subject of a thorough "nuts and bolts" restoration programme at the Isle of Wight Military History Museum and was converted back to Mk IV configuration (Info from the owner)

Churchill Mk VII – Curragh Camp, The Curragh (Ireland)

There is only one Churchill tank at Curragh. The fenders were locally fabricated as replacement and don't look like original ones. The other surviving Irish Churchill is located at Belfast. Research shows that the other two Irish Churchills (of the four that Ireland ever acquired) were scrapped in 1963 and 1967 (Raphael Riccio)

Churchill Mk VII Crocodile – John Pearson Collection (UK)

Former Castlemartin fire range gate guardian. This Churchill was one of the last but one batches completed and rolled off the line in August 1945. It was fitted with tropical air intakes for service in the Far East, but never left the United Kingdom due to the end of the war. Built in August 1945 as T341597L. Went straight to store at Ashchurch. Renumbered 39ZR61 in 1948. Sent to Castlemartin as a target in April 1957. Placed on plinth shortly after arrival until removed in 2009. Recovered for restoration in July 2012. It is still owned by the Tank Museum in Bovington, but it is put it on long term loan to John Pearson, who is willing to restore the tank to running condition (<http://www.hmvf.com/>)

Churchill Mk IV AVRE – Graye-sur-Mer (France)

This Churchill AVRE was lost during the landing on Juno Beach on 6 June 1944. It slipped in a crater filled with water when trying to put a faggot in it. A bridge element was placed on the roof of the tank, and gradually the crater was filled and later covered with concrete. The tank was found in November 1976, buried under the sand and recovered, at the crossing of the Arromanches road and Avenue du Général de Gaulle (100 meters far from its current location). It was then restored by the French army workshops in Caen and unveiled as a memorial on 15 October 1977. Information from [Le Churchill AVRE de Graye-sur-Mer](#)

Churchill Mk IV/IX LT ("Light Turret") AVRE – National Museum of Military History, Johannesburg (Republic of South Africa)

This Churchill was built in April, 1943 as an Mk IV by Leyland and armed with a 6-pounder gun. In September, 1943 field workshops added appliqué armour and a Mk VII commander's cupola. From April, 1944 it fought its way up Italy as a gun tank with the 25th Tank Brigade (British 8th Army). Late in 1944, it was modified by the addition of a Petard mortar and formed part of the newly formed 25th Armoured Engineers Brigade. In this rôle it was in action during the Senio River crossing and in the Po valley. The 25th Armoured Engineers Brigade was disbanded in May, 1945 after the cessation of hostilities in Italy and the Churchill handed to the 6th South African Armoured Division. In 1946, it was one of two AVREs to be shipped to South Africa for demonstration and training purposes (info. from the museum)

Churchill Mk II hull – Private collection (UK)

Formerly located at Springhead Hill, Storrington (UK). "It was during the training leading up to the Dieppe raid that 'A' Squadron, 14th Canadian Army Tank Battalion (Calgary Regt.), suffered what was then unceremoniously termed a 'dead-head'. This was the serious breakdown of a tank, and it is believed that due to the impending Dieppe raid and the gradual re-supply with Mark IIIs, this 'dead-head' was deemed as unsuitable for repair and withdrawn from service. It was then handed over to the infantry units of the 2nd Canadian Army Division and taken by them to the infantry training grounds above Storrington. Here the tank was used as a range target being fired upon by PIAT anti-tank weapons, amongst others, and when the troops pulled out after the war, was left sitting on the Downs. After the war, a member of the range clearing teams, who now lives in Storrington, remembers that to remove the tank it was simply rolled over into a bomb crater and buried. On 20 November 1993, the tank was recovered by the R.E.M.E. having been unearthed over the previous years by a number of hardy enthusiasts. Once rolled out of its grave it was placed on the edge of the field where it remains to this day." (Glen Carter). The turret has been used to aid restoration of another Churchill (Michael Fairbrother)
