The Horch chassis was recovered shortly after the war by a mechanic, from the area of Sizun in Brittany (France), where it was left by the German army in 1944. In the 1970s, this chassis was bought by the owner of the Roscoff 39-45 museum, who restored it. Original SdKfz 223 armour plates have also been discovered (engine cover and turret plates). The hull/turret were reconstructed with these plates and new steel, which makes this vehicle mostly a replica (information from the previous owner).

The chassis and mechanical parts where recovered from a separate location, it being used as some sort of beach buggy in Australia. More recently the Wheatcroft Collection has recovered a number or parts from Poland, Russia and the Czech Republic. The vehicle now is almost complete less radiator, cooling fan assembly, steering wheel, instrumentation and one or two interior fittings.” (http://www.warhistoryonline.com/military-vehicle-news/wheatcroft-collection-update-a-rare-horch-1941-sdkfz-223.html)
