Type 95 Ha-Go – Defense Technology Museum, Gotemba (Japan)

This tank was previously displayed at the Zero Park, Shirahama (Japan). It bears a Hull Number 4225 and appears to have been made in February-March 1943. It carries a late-war high velocity Type 98 37mm cannon. It was one of about 20 Type 95 tanks issued to Dokuritsu Konseii 52 Ryodan (52nd Independent Mixed Brigade) and sent in 1943 to Ponape (Pohnpei) Island near Truk in the Pacific Ocean; an island that was never invaded by Americans. Most of the remaining tanks are still there. In about 1985, tank number 4225 was acquired by Major General Seigo's Museum Foundation in complete unrestored condition. It was shipped back to Japan and put on display after external restoration at the Military Museum in Kyoto. When the museum closed the tank was moved to the Zero Park Display Area at Shirahama Gyoen Hotel near Osaka, and when this closed in 2005, it was restored to running order by Lewszyk Engineering Works

14 Type 95 Ha-Go tanks – “The Japanese Tank Farm”, Kolonia Pohnpei Island (Micronesia)

In the hillside of the Adams property, there were a number of large trenches cut like revetments and into these were parked 15 Japanese tanks, numbered 1 to 15 (http://www.pacificwrecks.com/provinces/fed_kolonia.html#adams). According to Stan Gadjia, "No. 8 will be the basis of a complete restoration because it is the commander's tank - note the smoke grenade launchers on the turret". One of the 15 tanks is now the property of the government of Micronesia (see below)

Three Type 95 Ha-Go tanks – Sunken in the near of the Chuuk Islands (Micronesia)

These tanks were sunk on the Japanese Naval Ship "San Francisco Maru", in the Chuuk (a.k.a. Truk) Lagoon. The Maru was sunk at the end of WWII, with "Operation Hailstone" in which the US Navy attacked the Japanese Imperial 4th Fleet stationed in Chuuk Lagoon. In the blaze of battle, 15 Japanese naval ships, six tankers, 17 cargo ships, and 265 planes disappeared beneath the sea (info. from various websites)

Type 95 Ha-Go – Australian War Memorial, Canberra (Australia)

One of the two Japanese tanks that was captured in a pivotal action at Milne Bay in New Guinea in September 1942 after the defeat of the Japanese landing force. It had been involved in actions with Australian infantry of the 61st and 2/10th Battalions, and was stopped by SX1603 Jack O'Brien with a Boyes anti-tank rifle on 28 August 1942. The tank was brought to Australia, dismantled, examined and partially reassembled by the Army. It was damaged by mine testing, then languished outside in a scrap yard for many years, and was then acquired by a private collector in the 1970's. The tank was repainted at that time and put into a diorama type display. No other conservation work was done other than the loose replacement of a non original track on one side of the tank. The Australian War Memorial acquired the tank in 2005 following the dispersal of this private collection, and restored it (AWM website)

Type 95 Ha-Go – National Armor and Cavalry Museum, Fort Benning, GA (USA)

This vehicle is currently stored and is not publicly visible. This particular Type 95 Ha-Go was a long-term resident of the old and new Patton Museum at Fort Knox. On the Pacific Wrecks web site at <http://www.pacificwrecks.com/> information from Daniel Sebby, curator of the California State Military Museum, states that this Ha-Go was one of two captured by the U.S. Army's 40th Infantry Division in the Philippines in 1945. Since the 40th Infantry Division fought on Luzon against the Japanese 2nd Tank Division equipped with Type 95s in all three of its regiments, the 6th, 7th, and 10th, it could be assumed that this Type 95 came from Luzon. It was brought back to California and put on display until transferred to the Patton Museum (Garry Redmon)

I'm looking for photos of those tanks :

any Japanese Tankette or Light Tank that I forgot....

This work would not have been as complete as it is, without the great help of **Trevor Larkum** and **Allan Kelly**, and their document "Preserved Japanese Tanks", which was released online for several years. Thanks to them for their researches.

This document is a synthesis of photos and information published on the web. I would like to thank the people who took these photos and put them on their websites, or sent them to me, and also those who helped me doing these lists (particularly people of the AFV News Discussion Board). For any question, you can email me at soldat_ryan@hotmail.com
