SU-76M hull – The Tank Museum, Beijing (China)

This M3A3 Propaganda Tank was developed based on the chassis of USSR SU-76 self-propelled gun and the turret of the US M3A3 Light Tank, mainly used for shooting of movies and TV plays. This tank ever took part in the shooting of more than 10 war movies such as *Jinan Campaign* and *Crusading from South to North* ("beijingman")

China Film Group Corporation, May 2009

Four SU-76M hulls – August 1st Film Studio, near Beijing (China)

They were built for Chinese movie trilogy "Da Jue Zhan" shot around 1990. They were supposed to be mock-ups of Japanese Type 97 Chi-Ha tanks. The fake turret looks like a hybrid of the original turret and the new turret (Shinhoto). These vehicles later appeared in more movies and TV series. In 2008, two of them were used in the shooting of "John Rabe", a German-Chinese-French production. They are now inside a warehouse of August 1st Film Studio near Beijing City. I believe they are all in running condition (Ye Meng)
