TU-26 tank – Central Armed Forces Museum, Moscow (Russia)

This TU-26 radio-control tank is one of the unique exhibits of the Central Army Museum. Almost the same than the T-26, but with 3 aerial mounts (2 of them are now removed). It was used to control TT-26 radio-controlled tanks. This tank served in 217 Independent Tank Battalion and was used in Winter War in Finland. Later, the battalion was renamed "57 Independent Tank Battalion". It was used in Fall 1941 as an ordinary T-26 tank, and later evacuated to Ryazan. In 1944, It went to the Kubinka proving ground. It is the only survivor of its kind.

Only one TT-26 radio-controlled tank (the counter part of the TU-26 radio-control tank) also survived. It is located in Patriot park in Kubinka, see below (Yuri Pasholok)

T-26 m1935 reproduction – Pitkyaranta, Republic of Karelia (Russia)

At the end of 2005 in Pitkyarante was constructed a new monument to the RKKA (Workers' and Peasants' Red Army). A T-26 was installed there, and this tank appears to be a reproduction. The original T-26 m1939 tank which was found in 1998 on the bottom of the Ladoga river, near the city, is now located in France, it is part of the ASPHM collection (Wikipedia)

I'm looking for photos of those tanks :

any T-26 tank that I forgot....

This document is a compilation of photos published on the web. I would like to thank especially **Rafał Białęcki**, who deserved a great part of the job on this document, and also the people who took these photos and put them on their websites, or sent them to me, and those who helped me doing these lists (particularly people of the AFV News Discussion Board). For any question, you can email me at soldat_ryan@hotmail.com
